Photos may include optional equipment.

NET HORSEPOWER

121 HP @ 2100 rpm 90 kW @ 2100 rpm

OPERATING WEIGHT

38,720-43,115 lb 17600-19598 kg

BUCKET CAPACITY

0.48-1.24 yd3 0.37-0.95 m³

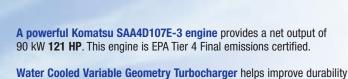

POWER, CONTROL AND MORE LIFT CAPACITY

Two Counterweight Options Expand Versatility

The standard counterweight provides powerful lift capacity while permitting transport on a 40,000lb tag trailer. An optional heavy counterweight maintains stability and lift when the machine is equipped with a quick coupler, bucket, and thumb.

Enhanced Power Mode

Enhanced engine and hydraulic pump control logic improves multi-function speed for up to 6% improved productivity.

and improves engine response under all speed and load conditions.

Temperature controlled viscous fan clutch helps improve fuel efficiency and reduce sound levels.

Komatsu Diesel Oxidation Catalyst (KDOC) reduces particulate matter using passive regeneration over 98% of the time.

Selective Catalytic Reduction (SCR) reduces NOx and has easy to access components.

Komatsu Auto Idle Shutdown helps reduce nonproductive engine idle time and reduces operating costs.

Komatsu's Closed-center Load Sensing System (CLSS) provides quick response and smooth operation to maximize productivity.

Six working modes are designed to match engine speed, pump output and system pressure to a wide range of applications.

Rearview monitoring system (standard)

Large LCD color monitor:

- 7" high resolution display
- Enhanced hydraulic attachment control with one way/two way flow and programmable work tool names and settings
- Rear view camera display integrated into the default monitor screen
- All machine settings and controls are easily accessible through the monitor

Aux jack and (2) 12V outlets

Equipment Management Monitoring System (EMMS) continuously monitors machine operation and vital systems to identify machine issues and assist with troubleshooting.

Wide access service doors provide easy access for ground level maintenance.

Enhanced working environment

- High back, heated, air suspension operator seat with adjustable arm rests
- Integrated ROPS cab design
- Cab meets ISO Level 1 Operator Protective Guard (OPG) top guard
- Standard pattern change valve to switch from ISO to BH control pattern
- Aux jack and (2) 12V power outlets
- Auto climate control

Komatsu designed and manufactured components

New engine and hydraulic control technology work together to improve multifunction and productivity up to 6% with similar fuel efficiency as the PC170LC-10.

Handrails (standard) provide convenient access to the upper structure.

Battery disconnect switch allows a technician to disconnect the power supply before servicing the machine.

Operator Identification System records KOMTRAX machine operation and application data for up to 100 individual ID codes.

KOMTRAX®

The KOMTRAX® telematics system is standard on Komatsu equipment with no subscription-fees throughout the life of the machine. Using the latest wireless technology, KOMTRAX® transmits valuable information such as location, utilization, and maintenance records to a PC or smartphone app. Custom machine reports are provided for identifying machine efficiency and operating trends. KOMTRAX® also provides advanced machine troubleshooting capabilities by continuously monitoring machine health.

PERFORMANCE FEATURES

KOMATSU NEW ENGINE TECHNOLOGIES

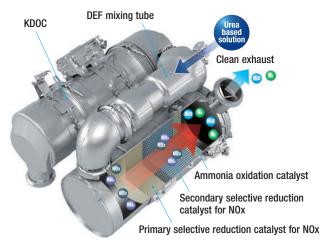

New Tier 4 Final Engine

The Komatsu SAA4D107E-3 engine is EPA Tier 4 Final emissions certified and provides exceptional performance and efficiency. Based on Komatsu proprietary technologies developed over many years, this new diesel engine reduces nitrogen oxides (NOx) by more than 80% when compared to Tier 4 interim levels. Through the in-house development and production of engines, electronics, and hydraulic components, Komatsu has achieved great advancements in technology, providing high levels of performance and efficiency in virtually all applications.

Heavy-duty aftertreatment system

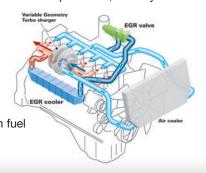

This new system combines a Komatsu Diesel Oxidation Catalyst (KDOC) and Selective Catalytic Reduction (SCR). The SCR NOx reduction system injects the correct amount of Diesel Exhaust Fluid (DEF) at the proper rate, thereby decomposing NOx into non-toxic water vapor (H₂O) and nitrogen gas (N₂).

Heavy-duty cooled Exhaust Gas Recirculation (EGR) system

The system recirculates a portion of exhaust gas into the air intake and lowers combustion temperatures, thereby

reducing NOx emissions.
EGR gas flow has been decreased for Tier 4 Final with the addition of SCR technology. The system achieves a dynamic reduction of NOx, while helping maintain T4 interim fuel consumption levels.

Advanced Electronic Control System

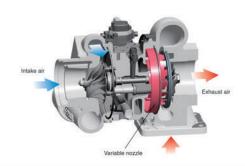

Cooled EGR

Urea SCR

The electronic control system performs high-speed processing of all signals from sensors installed in the vehicle providing total control of equipment in all conditions of use. Engine condition information is displayed via an on-board network to the monitor inside the cab, providing necessary information to the operator. Additionally, managing the information via KOMTRAX helps customers keep up with required maintenance.

Variable Geometry Turbocharger (VGT) system

The VGT system features proven Komatsu designed hydraulic technology for variable control of air-flow and supplies optimal air according to load conditions. The upgraded version provides better exhaust temperature management.

Komatsu Auto Idle Shutdown

Komatsu auto idle shutdown automatically shuts the engine down after idling for a set period of time to reduce unnecessary fuel consumption and exhaust emissions. The countdown to engine shutdown can be easily programmed from 5 to 60 minutes.

Heavy-Duty High-Pressure Common Rail (HPCR) Fuel Injection System

The system is designed to achieve an optimal injection of high-pressure fuel by means of computerized control, providing close to complete combustion to reduce PM emissions. While this technology is already used in current engines, the new system uses high pressure injection, thereby reducing PM emissions over the entire range of engine operating conditions. The Tier 4 Final engine has advanced fuel injection timing for reduced soot levels.

Enhanced Productivity

The PC170LC-11's enhanced P mode provides improved performance and productivity.

Productivity

Up to 6% increase (compared to the PC170LC-10 in P Mode)

P mode (90 degree swing truck loading)

PERFORMANCE FEATURES

Increased Work Efficiency

Large digging force

With the one-touch Power Max. function digging force has been further increased. (8.5 seconds of operation)

Maximum arm crowd force (ISO)

80.4 kN(8.2t) > 86.3 kN(8.8t) 7 % UP

Maximum bucket digging force (ISO)

113 kN(11.6t) 123 kN(12.5t) 8 % UP

Measured with Power Max, function, 2610mm arm and ISO 6015 rating.

Large Displacement High Efficiency Pump

Large displacement hydraulic implement pump provides high flow output at lower engine RPM as well as operation at the most efficient engine speed.

Working Mode Selection

The PC170LC-11 excavator is equipped with six working modes (P, E, L, B, ATT/P and ATT/E). Power Mode provides improved hydraulic power and faster cycle times for improved performance in demanding applications. Each mode is designed to match engine speed, pump flow, and system pressure to the application. The PC170LC-11 features an attachment mode (ATT/E) that allows operators to run attachments while in Economy mode.

Working Mode	Application	Advantage
Р	Power Mode	•Maximum production, power & multifunction
E Economy Mode •Good cycle times with reconsumption		•Good cycle times with reduced fuel consumption
L	Lifting Mode/ Fine Control	•Increased lifting power & fine control
В	Breaker Mode	One way flow for hydraulic breaker operation
ATT/P	Attachment Power Mode	•Two way flow with maximum power
ATT/E	Attachment Economy Mode	•Two way flow with most efficient fuel economy

High Rigidity Work Equipment

Booms and arms are constructed with thick plates of high tensile strength steel. In addition, these structures are designed with large cross sectional areas and large one piece

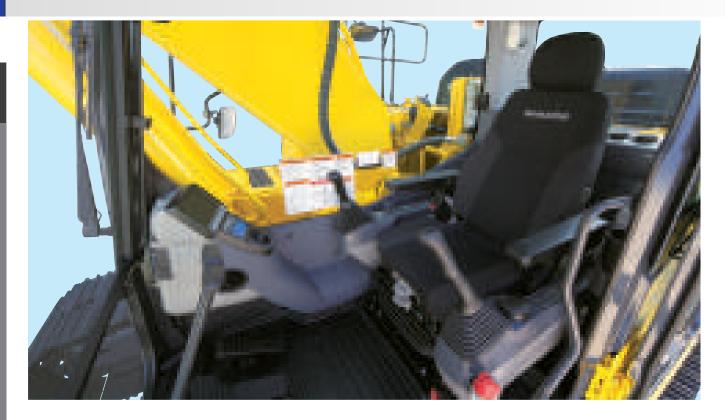

castings in the boom foot, the boom tip, and the arm tip. The result is work equipment that exhibits long term durability and high resistance to bending and torsional stress. A standard HD boom design provides increased strength and reliability.

WORKING ENVIRONMENT

WORKING ENVIRONMENT

Comfortable Working Space

Wide spacious cab

The wide spacious cab includes a heated air suspension seat with reclining backrest. The seat height and position are easily adjusted using a pull-up lever. The armrest position is easily adjusted together with the console.

Arm rest with simple height adjustment function

A knob and plunger on the armrests allows easy height adjustment without the use of tools.

Low vibration with cab damper mounting

Automatic climate control

Pressurized cab

Auxiliary input jack

Connecting a regular audio device to the auxiliary jack allows the operator to hear the sound from the stereo speakers installed in the cab.

Standard Equipment

Sliding window glass (left side)

Remote intermittent wiper with windshield washer

Opening & closing skylight

Defroster (conforms to the ISO standard)

Radio, ashtray

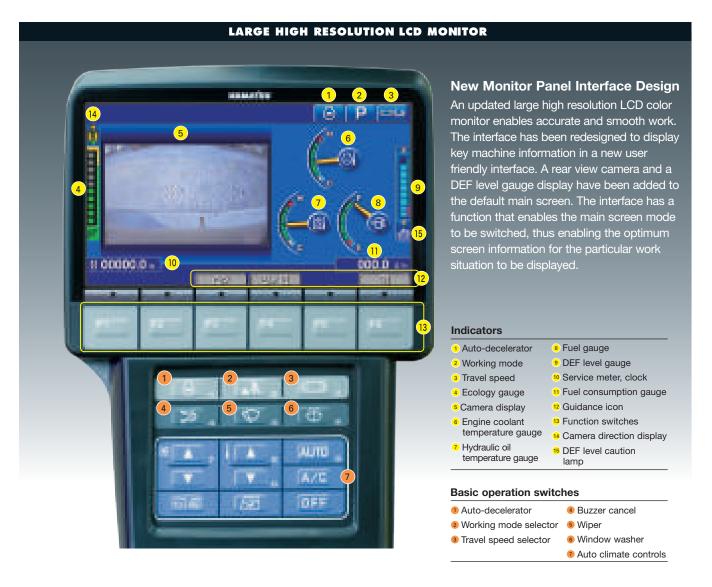

Magazine box & cup holder

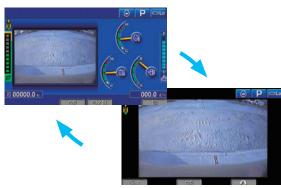

One-touch storable front window lower glass

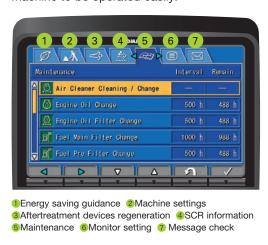

Switchable Display Modes

The main screen display mode can be changed by pressing the F3 key.

Visual user menu

Pressing the F6 key on the main screen displays the user menu screen. The menus are grouped for each function, and use easy-to-understand icons which enable the machine to be operated easily.

WORKING ENVIRONMENT

Support Efficiency Improvement

Ecology guidance

While the machine is operating, ecology guidance pops up on the monitor screen to notify the operator of the status of the machine in real time.

Ecology gauge & fuel consumption gauge

The monitor screen is provided with an ecology gauge and also

a fuel consumption gauge which is displayed continuously. In addition, the operator can set any desired target value of fuel consumption (within the range of the green display), enabling the machine to be operated with better fuel economy.

Operator Identification Function

An operator identification (ID) code can be set for each operator and used to manage operation information of

KOMTRAX can be used to analyze operation status by

operator, application, as well as by machine.

individual machines using KOMTRAX data. Data sent from

Ecology guidance

Operation record, fuel consumption history, and ecology guidance record

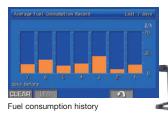

The ecology guidance menu enables the operator to check the operation record, fuel consumption history and ecology guidance record from the ecology guidance menu, with a single touch, thus assisting operators with reducing total fuel consumption.

MAINTENANCE FEATURES

Centralized engine check points

Locations of the engine oil check and filters are integrated into one side to allow easy maintenance and service.

Engine oil filter

Fuel pre-filter (with water separator)

High efficiency fuel filter

Battery disconnect switch

A standard battery disconnect switch allows a technician to disconnect the power supply and lock out before servicing the machine.

Easily accessible cabin air filter

Washable cab floor mat

Sloping track frame

Track frames are designed to allow material to escape the roller frames during travel and aid material removal during cleaning.

Utility space

A lockable utility box is located on the right-hand platform allowing for storage of items.

Side by side single panel engine and hydraulic oil coolers simplify maintenance.

Fuel pre-filter with water separator

High efficiency primary fuel filter

Easy access to engine oil filter, engine oil, drain valve, fuel drain valve and water separator drain valve

MAINTENANCE FEATURES

Long-life oils, filters

High performance filters are used in the hydraulic circuit and engine. By increasing the oil and filter replacement intervals, maintenance costs can be significantly reduced.

Hydraulic oil filter (Ecology-white element)

Large capacity air cleaner

Large capacity air cleaner is comparable to that of larger machines. The larger air cleaner can extend air cleaner life during long-term operation and helps prevent early clogging, and resulting power loss. A radial seal design is used for reliability.

Diesel Exhaust Fluid (DEF) tank

A large tank volume extends operating time before refilling and

is installed on the right front platform for easy access. DEF tank and pump are separated for improved service access.

Maintenance Information

"Maintenance time caution lamp" display

When the remaining time to maintenance becomes less than 30 hours*, a maintenance time monitor appears. Pressing the F6 key switches the monitor to the maintenance screen.

*: The setting can be changed within the range between 10 and 200 hours.

ROMAYSU Ø ♠À ⇔ ♠ ♣ ₩ ■ ₩

Maintenance screen

Supports the DEF level and refill timing

The DEF level gauge is displayed continuously on the right side of the monitor screen. In addition, when DEF level is low, DEF low level guidance messages appear in pop up displays to inform the operator in real time.

DEF level gauge

DEF low level guidance

Cooling Package Debris Screens

Debris screens reduce cooling package core plugging and

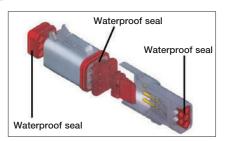

are easily removeable for cleaning.

Debris Screen

DT-type connectors

Sealed DT-type electrical connectors provide high reliability, water and dust resistance.

GENERAL FEATURES

ROPS CAB STRUCTURE

ROPS Cab (ISO 12117-2)

The machine is equipped with a ROPS cab that conforms to ISO 12117-2 for excavators as standard equipment. It also satisfies the requirements for Level 1 Operator Protective Guard (OPG) and top guard (ISO 10262).

Rear View Monitoring System

A new rear view monitoring system display has a rear view camera image that is continuously displayed together with the gauges and important vehicle information. This enables the operator to carry out work while easily checking the surrounding area.

Rear view camera

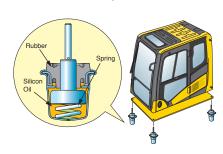

Rear view image on monitor

Low Vibration with Viscous Cab Mounts

The PC170LC-11 uses viscous mounts for the cab that incorporate a longer stroke and the addition of a spring. The cab damper mounting combined with a high rigidity deck reduces vibration at the operator's seat.

General Features

Secondary engine shut down switch at base of seat to shutdown the engine.

Left and right side handrails

Seat belt caution indicator

Lock lever

Seat belt retractable

Tempered & tinted glass

Large mirrors

Slip-resistant plates

Thermal and fan guards

Pump/engine room partition

Travel alarm

Large cab entrance step

KOMATSU PARTS & SERVICE SUPPORT

KOMATSU CARE

Program Includes:

*The PC170LC-11 comes standard with complimentary factory scheduled maintenance for the first 3 Years or 2,000 Hours, whichever occurs first.

Planned Maintenance Intervals at:

500/1000/1500/2000 hour intervals. (250 hr. initial interval for some products) Complimentary Maintenance Interval includes: Replacement of Oils & Fluid Filters with genuine Komatsu Parts, 50-Point inspection, Komatsu Oil & Wear Analysis Sampling (KOWA) / Travel & Mileage (distance set by distributor; additional charges may apply)

Benefits of Using Komatsu CARE

- Assurance of Proper Maintenance with OEM Parts & Service
- Increased Uptime & Efficiency
- Factory Certified Technicians Performing Work
- Cost of Ownership Savings
- Transferable Upon Resale

Complimentary SCR System Maintenance

The PC170LC-11 also includes 2 factory recommended services of the Selective Catalytic Reduction (SCR) Diesel Exhaust Fluid (DEF) system during the first 5 years or 9,000 hours whichever occurs first. The service includes factory recommended DEF tank flush & strainer cleaning at the suggested service intervals of 4,500 hours & 9,000 hours.

^{*} Certain exclusions and limitations apply. Refer to the customer certificate for complete program details and eligibility. Komatsu® and Komatsu Care® are registered trademarks of Komatsu Ltd. Copyright 2019 Komatsu America Corp.

Komatsu CARE® - Extended Coverage

- Extended Coverage can provide peace of mind by protecting customers from unplanned expenses that effect cash flow
- Purchasing extended coverage locks-in the cost of covered parts and labor for the coverage period and helps turn these into fixed costs

Komatsu Parts Support

- 24/7/365 to fulfill your parts needs
- 9 parts Distribution Centers strategically located across the U.S. and Canada
- Distributor network of more than 300 locations across U.S. and Canada to serve you
- Online part ordering through Komatsu eParts
- Remanufactured components with same-as-new warranties at a significant cost reduction

Komatsu Oil and Wear Analysis (KOWA)

- KOWA detects fuel dilution, coolant leaks, and measures wear metals
- Proactively maintain your equipment
- Maximize availability and performance
- Can identify potential problems before they lead to major repairs
- Reduce life cycle cost by extending component life

KOMTRAX EQUIPMENT MONITORING

- KOMTRAX is Komatsu's remote equipment monitoring and management system
- KOMTRAX continuously monitors and records machine health and operational data
- Information such as fuel consumption, utilization, and a detailed history lowering owning and operating cost

KOMTRAX is standard equipment on all Komatsu construction products

- Knowing when machines are running or idling can help improve fleet utilization
- Detailed movement records ensure you know when and where your equipment is moved
- Up to date records allow you to know when maintenance is due and help you plan for future maintenance needs

- KOMTRAX data can be accessed virtually anywhere through your computer, the web or your smart phone
- Automatic alerts keep fleet managers up to date on the latest machine notifications

- Knowledge is power make informed decisions to manage your fleet better
- Knowing your idle time and fuel consumption will help maximize your machine efficiency
- Take control of your equipment
- any time, anywhere

For construction and compact equipment.

For production and mining class machines.

*Asterisk indicates load is limited by hydraulic capacity rather than tipping. Ratings are based on ISO standard No. 10567. Rated load capacity does not exceed 87% of hydraulic lift capacity or 75% of tipping load. Total weight of bucket and/or installed attachments must be deducted from the capacities shown above. Lift capacity chart is based on machine located on a solid, level and uniform surface. Load ratings are at the arm bucket pin location, use of any attachment point in a different location to handle objects could affect excavator lift performance.

*Asterisk indicates load is limited by hydraulic capacity rather than tipping. Ratings are based on ISO standard No. 10567. Rated load capacity does not exceed 87% of hydraulic lift capacity or 75% of tipping load. Total weight of bucket and/or installed attachments must be deducted from the capacities shown above. Lift capacity chart is based on machine located on a solid, level and uniform surface. Load ratings are at the arm bucket pin location, use of any attachment point in a different location to handle objects could affect excavator lift performance.

*Asterisk indicates load is limited by hydraulic capacity rather than tipping. Ratings are based on ISO standard No. 10567. Rated load capacity does not exceed 87% of hydraulic lift capacity or 75% of tipping load. Total weight of bucket and/or installed attachments must be deducted from the capacities shown above. Lift capacity chart is based on machine located on a solid, level and uniform surface. Load ratings are at the arm bucket pin location, use of any attachment point in a different location to handle objects could affect excavator lift performance.

*Asterisk indicates load is limited by hydraulic capacity rather than tipping. Ratings are based on ISO standard No. 10567. Rated load capacity does not exceed 87% of hydraulic lift capacity or 75% of tipping load. Total weight of bucket and/or installed attachments must be deducted from the capacities shown above. Lift capacity chart is based on machine located on a solid, level and uniform surface. Load ratings are at the arm bucket pin location, use of any attachment point in a different location to handle objects could affect excavator lift performance.

10910

-15'

LIFTING CAPACITY WITH LIFTING MODE

- A: Reach from swing center
- B: Bucket hook height
- C: Lifting capacity
- Cf: Rating over front
- Cs: Rating over side
- $\ensuremath{\boldsymbol{\Theta}}$: Rating at maximum reach

Conditions:

- 5150 mm **16' 11"** one-piece boom
- Counterweight: 3240 kg **7,143 lb**

*Asterisk indicates load is limited by hydraulic capacity rather than tipping. Ratings are based on ISO standard No. 10567. Rated load capacity does not exceed 87% of hydraulic lift capacity or 75% of tipping load. Total weight of bucket and/or installed attachments must be deducted from the capacities shown above. Lift capacity chart is based on machine located on a solid, level and uniform surface. Load ratings are at the arm bucket pin location, use of any attachment point in a different location to handle objects could affect excavator lift performance.

- Alternator, 85 Ampere, 24V
- AM/FM radio
- Automatic engine warm-up system
- Automatic climate control/air conditioner/ heater/defroster
- Auxiliary input (3.5mm jack)
- Batteries, large capacity
- Battery disconnect switch
- Boom holding valve
- Converter, (2) x 12V
- Dry type air cleaner, double element
- Electric horn
- EMMS monitoring system
- Engine, Komatsu SAA4D107E-3
- Engine overheat prevention system
- Extended work equipment grease interval
- Fan guard structure

- Fuel system pre-cleaner 10 micron
- High back air suspension seat, with heat
- Hydraulic track adjusters
- KOMTRAX® Level 5
- Large LCD color monitor, high resolution
- Lock lever
- Mirrors, (LH and RH)
- Operator identification function
- Operator Protective Top Guard (OPG), Level 1 (ISO 10262)
- Pattern change valve (ISO to BH control)
- PPC hydraulic control system
- Pump/engine room partition
- Radiator and oil cooler debris screen
- Rear reflectors
- Rearview monitoring system (1 camera)
- Revolving frame undercovers

- ROPS cab (ISO 12117-2)
- Seat belt, retractable, 76mm 3"
- Seat belt indicator
- Secondary engine shutoff switch
- Service valve
- Shoes, triple grouser, 600 mm 24"
- Skylight
- Slip resistant foot plates
- Starter motor, 4.5kW
- Suction fan with viscous clutch
- Track frame swivel guard
- Travel alarm
- Two speed travel with auto shift
- Working lights, 1 cab LH side/1 boom RH
- Working mode selection system

OPTIONAL EQUIPMENT

- Arms
 - 2900 mm 9'6" arm assembly
- 2610 mm 8'7" arm assembly
- 2900 mm 9'6" arm w/ one actuator piping - 2610 mm 8'7" arm w/ one actuator piping
- Boom
- 5150 mm **16'11"** boom assembly
- 5150 mm 16'11" boom w/ one actuator piping
- Counterweight
- 2750 kg **6,063 lb**
- 3240 kg **7,143 lb**
- Cab quards
 - Full front guard, OPG Level 1
 - Full front guard, OPG Level 2
 - Bolt-on top guard, OPG Level 2
- Hydraulic control unit, 1 actuator
- Shoes, triple grouser, 700 mm 28"
- Shoes, triple grouser, 800 mm 31.5"
- Sun visor
- Rain visor

ATTACHMENT OPTIONS

- Buckets
- Hydraulic couplers
- Hydraulic kits, field installed
- Thumbs

For a complete list of available attachments, please contact your local Komatsu distributor.
